SUMMARY INDEX OF SPARE PARTS IN ALPHABETICAL SEQUENCE	foll.

- This catalogue has been drawn up to help you look for, find and order spare parts through the specific part name or part number.
- The catalogue is arranged as follows: introductory pages with instructions on how to use the catalogue and order spare parts, main body of the catalogue including the various search indexes as well as the spare parts illustrations as specified in the "Index of Machine Groups and Assemblies" at the beginning of this section.
- The machine is divided into several functional groups or assemblies, and each functional group is in turn composed of one or more spare parts illustrations, depending on its complexity.
- The index of functional groups or assemblies is therefore ***the main search key*** you should use to find the illustration you want and the specific part you require.
- ***A secondary search key*** in both alphabetical and numerical sequence is the summary index of the spare parts which can be used to perform the process in reverse -i.e. given the part number you can identify the name of the part, the illustration in which it is shown, its quantity and its position number in the illustration.
- The index of illustrations is intended as a quick overview of all of the illustrations included in the catalogue, in the order in which they appear.
- For more information, contact the TEREXLIFT Customer Service.
