HOW TO USE THE SERVICE PARTS MANUAL

1. WHEN THE PART NUMBER IS NOT KNOWN

- Determine the function and application of the part required. Turn to the TABLE OF CONTENTS and select the most appropriate component description.
- Turn to the page number indicated and locate the part description in the parts list. Read the full accompanying description for specific information regarding the part that was not shown in the index.
- From the parts list, obtain the item number assigned to it and confirm that the part selected is correct by verifying it with the pictorial representation on the illustrated page.

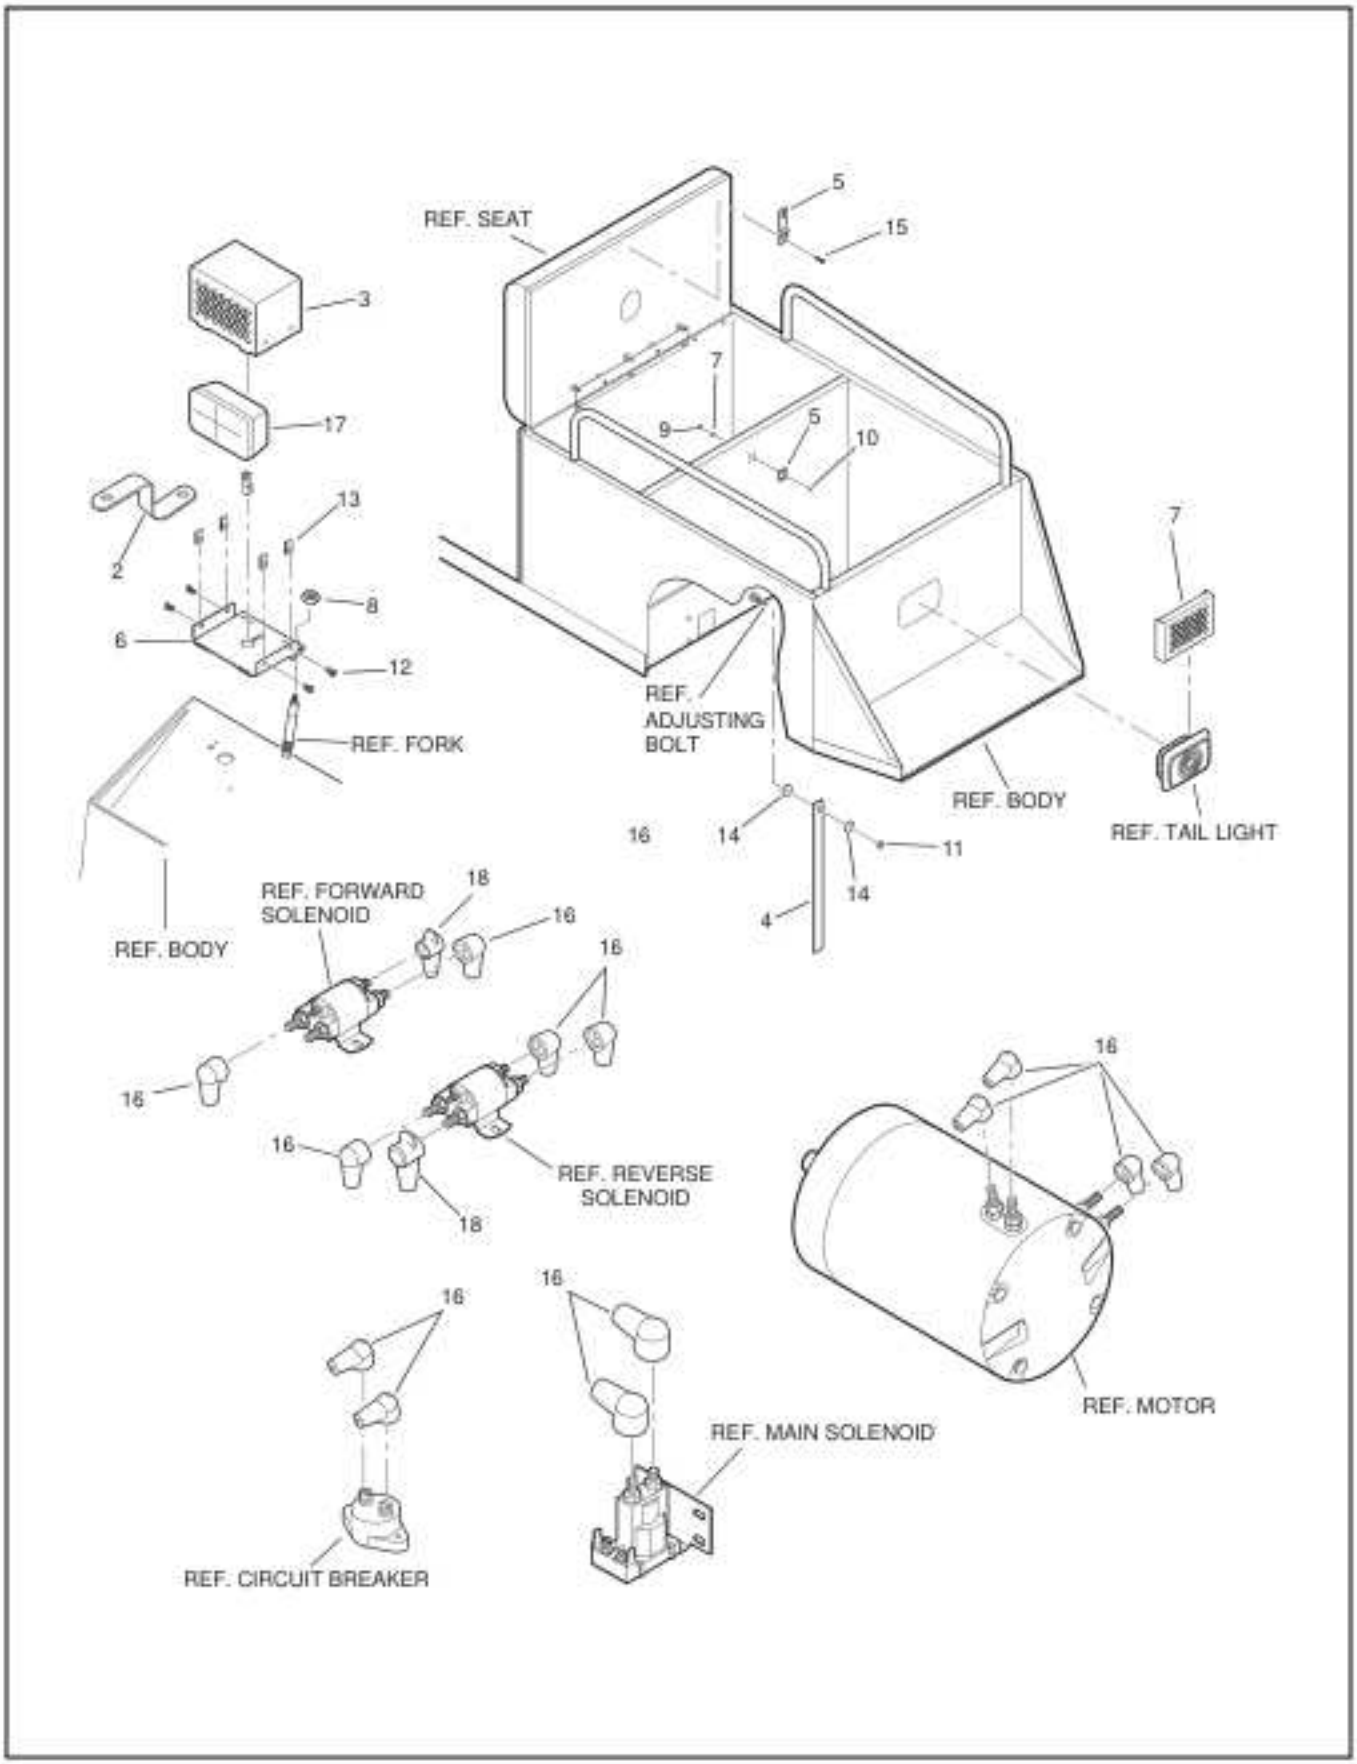

Should an asterisk (*) appear in the part number column on the parts list page, read upwards until a part number is found. The part number is the lowest assembly sold by Service Parts. The asterisk (*) indicates that the part depicted is not available for purchase.

NOTE: Descriptions are indented under the assembly that they are used on. That assembly is, in turn listed under the assembly that it is used on. This process is repeated until the highest final assembly is reached.

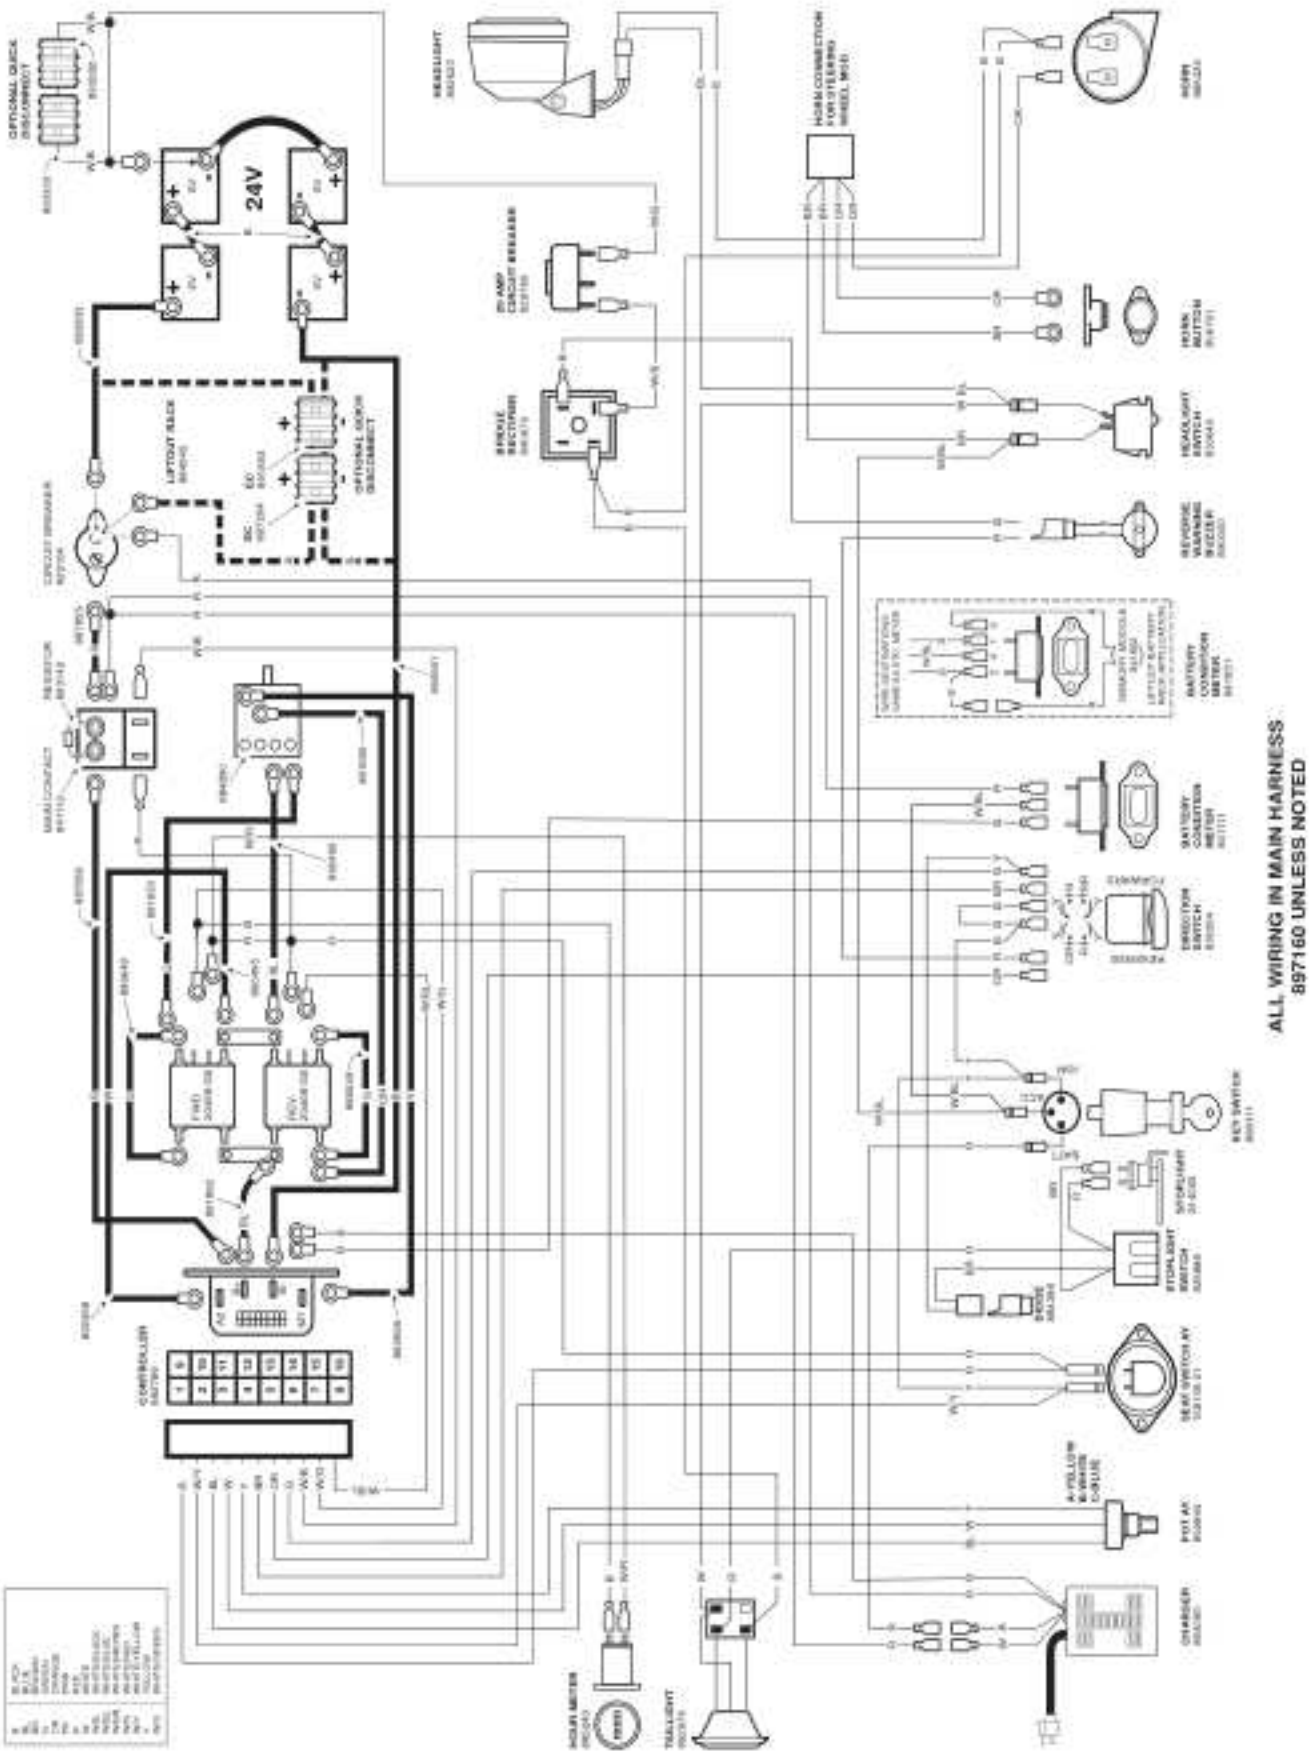

To facilitate the maintenance and repair of the vehicle, a Technician's Repair and Service Manual is available from the Service Parts Department.
