B. BEFORE OPERATING THE BOBCAT LOADER

This safety symbol is used for important safety messages. When you see this symbol, follow the safety message to avoid personal injury or death.

B-10731

The Bobcat loader must be in good operating condition before use.

Check all of the items on the Service Schedule under the 8 - 10 hour column.

C. SAFE OPERATION NEEDS A QUALIFIED OPERATOR

A QUALIFIED OPERATOR* MUST DO THE FOLLOWING:

1. UNDERSTAND THE WRITTEN INSTRUCTIONS, RULES AND REGULATIONS

   a. The written instructions from Melroe Company include the delivery report, operation & maintenance manual and handbook, FIEI manual and machine signs (decals).

   b. Check the rules and regulations at your location. The rules may include an employer's work safety requirements. Regulations may identify a hazard such as utility supply line.

2. HAVE TRAINING WITH ACTUAL OPERATION

   a. Operator training must consist of a demonstration and verbal instruction. This training is given by your dealer before the loader is delivered.

   b. The new operator should start in an area without bystanders and use all the controls until he can control the loader safely under all conditions of his work area. Always fasten seat belt and lower the restraint arm before operating.

3. KNOW THE WORK CONDITIONS

   a. For each material to be handled, the operator must know how to avoid exceeding the rated operating capacity of the loader. For example in handling certain loose material with a given bucket, he must know whether he can safely take a full or part of a bucket load.

   b. The operator must know any prohibited uses or work areas, for example, he needs to know about excessive slopes.

   c. Safety glasses, hearing protection or loader special applications kit are required for some work. See your dealer about Melroe safety equipment.

* For an operator to be qualified, he must not take drugs or alcoholic drinks which change his alertness or coordination while working. An operator who is taking prescription drugs must get medical advice on whether or not he can safely operate a machine.
