*The "O" rings are the determining factor to distinguish between a TB07 and a TC07 Valve:
TB07 has round "O" rings between sections
TC07 has square "O" rings between sections

IMPORTANT NOTICE

On certain early production machines, it will be necessary to relocate the valve slightly, see Figure 2. The new detent mechanism is 9/16 inch longer than the prior style. The extra length of the valve cap may interfere with mounting of the new valve in the existing holes on certain models.
