NISSAN FORKLIFT

REF NUMBER:	SB2012-324R
DATE REVISED:	January 2013
CATEGORY:	Brake

SERVICE BULLETIN
CLASS I, IV, V

TO:	All Dealer Principals, General Managers, Service Managers, Field Service Technicians
FROM:	NFC Customer Quality Service Department
APPLIED MODEL:	1N1 and A1N1 (TX)
PROCEDURE:	Brake Adjustment

NFC's Customer Quality Service Dept. has received questions regarding brake adjustments on the 1N1 and A1N1 brake system. Please review the following procedure, in its entirety, prior to performing any adjustments.

If any adjustment is necessary, perform the entire procedure.

To prepare for the following procedure please have the following tools available for use:

1. 1N1 or A1N1 Service Manual
2. Suitable blocks for supporting the unit with the tires off of the ground
3. Suitable blocks for securing the mast assembly in the upright position
4. Suitable chain for securing mast channel
5. Metric combination wrench set
6. 3/8 ratchet
7. 3/8 drive metric socket set
8. #3 Phillips screw driver
9. 1/4 inch flat blade screw driver
10. Steel ruler with depth gauge (mm graduations)
11. 100 lb spring scale

WARNING

Observe all safety precautions, as per the applicable service manual sections.

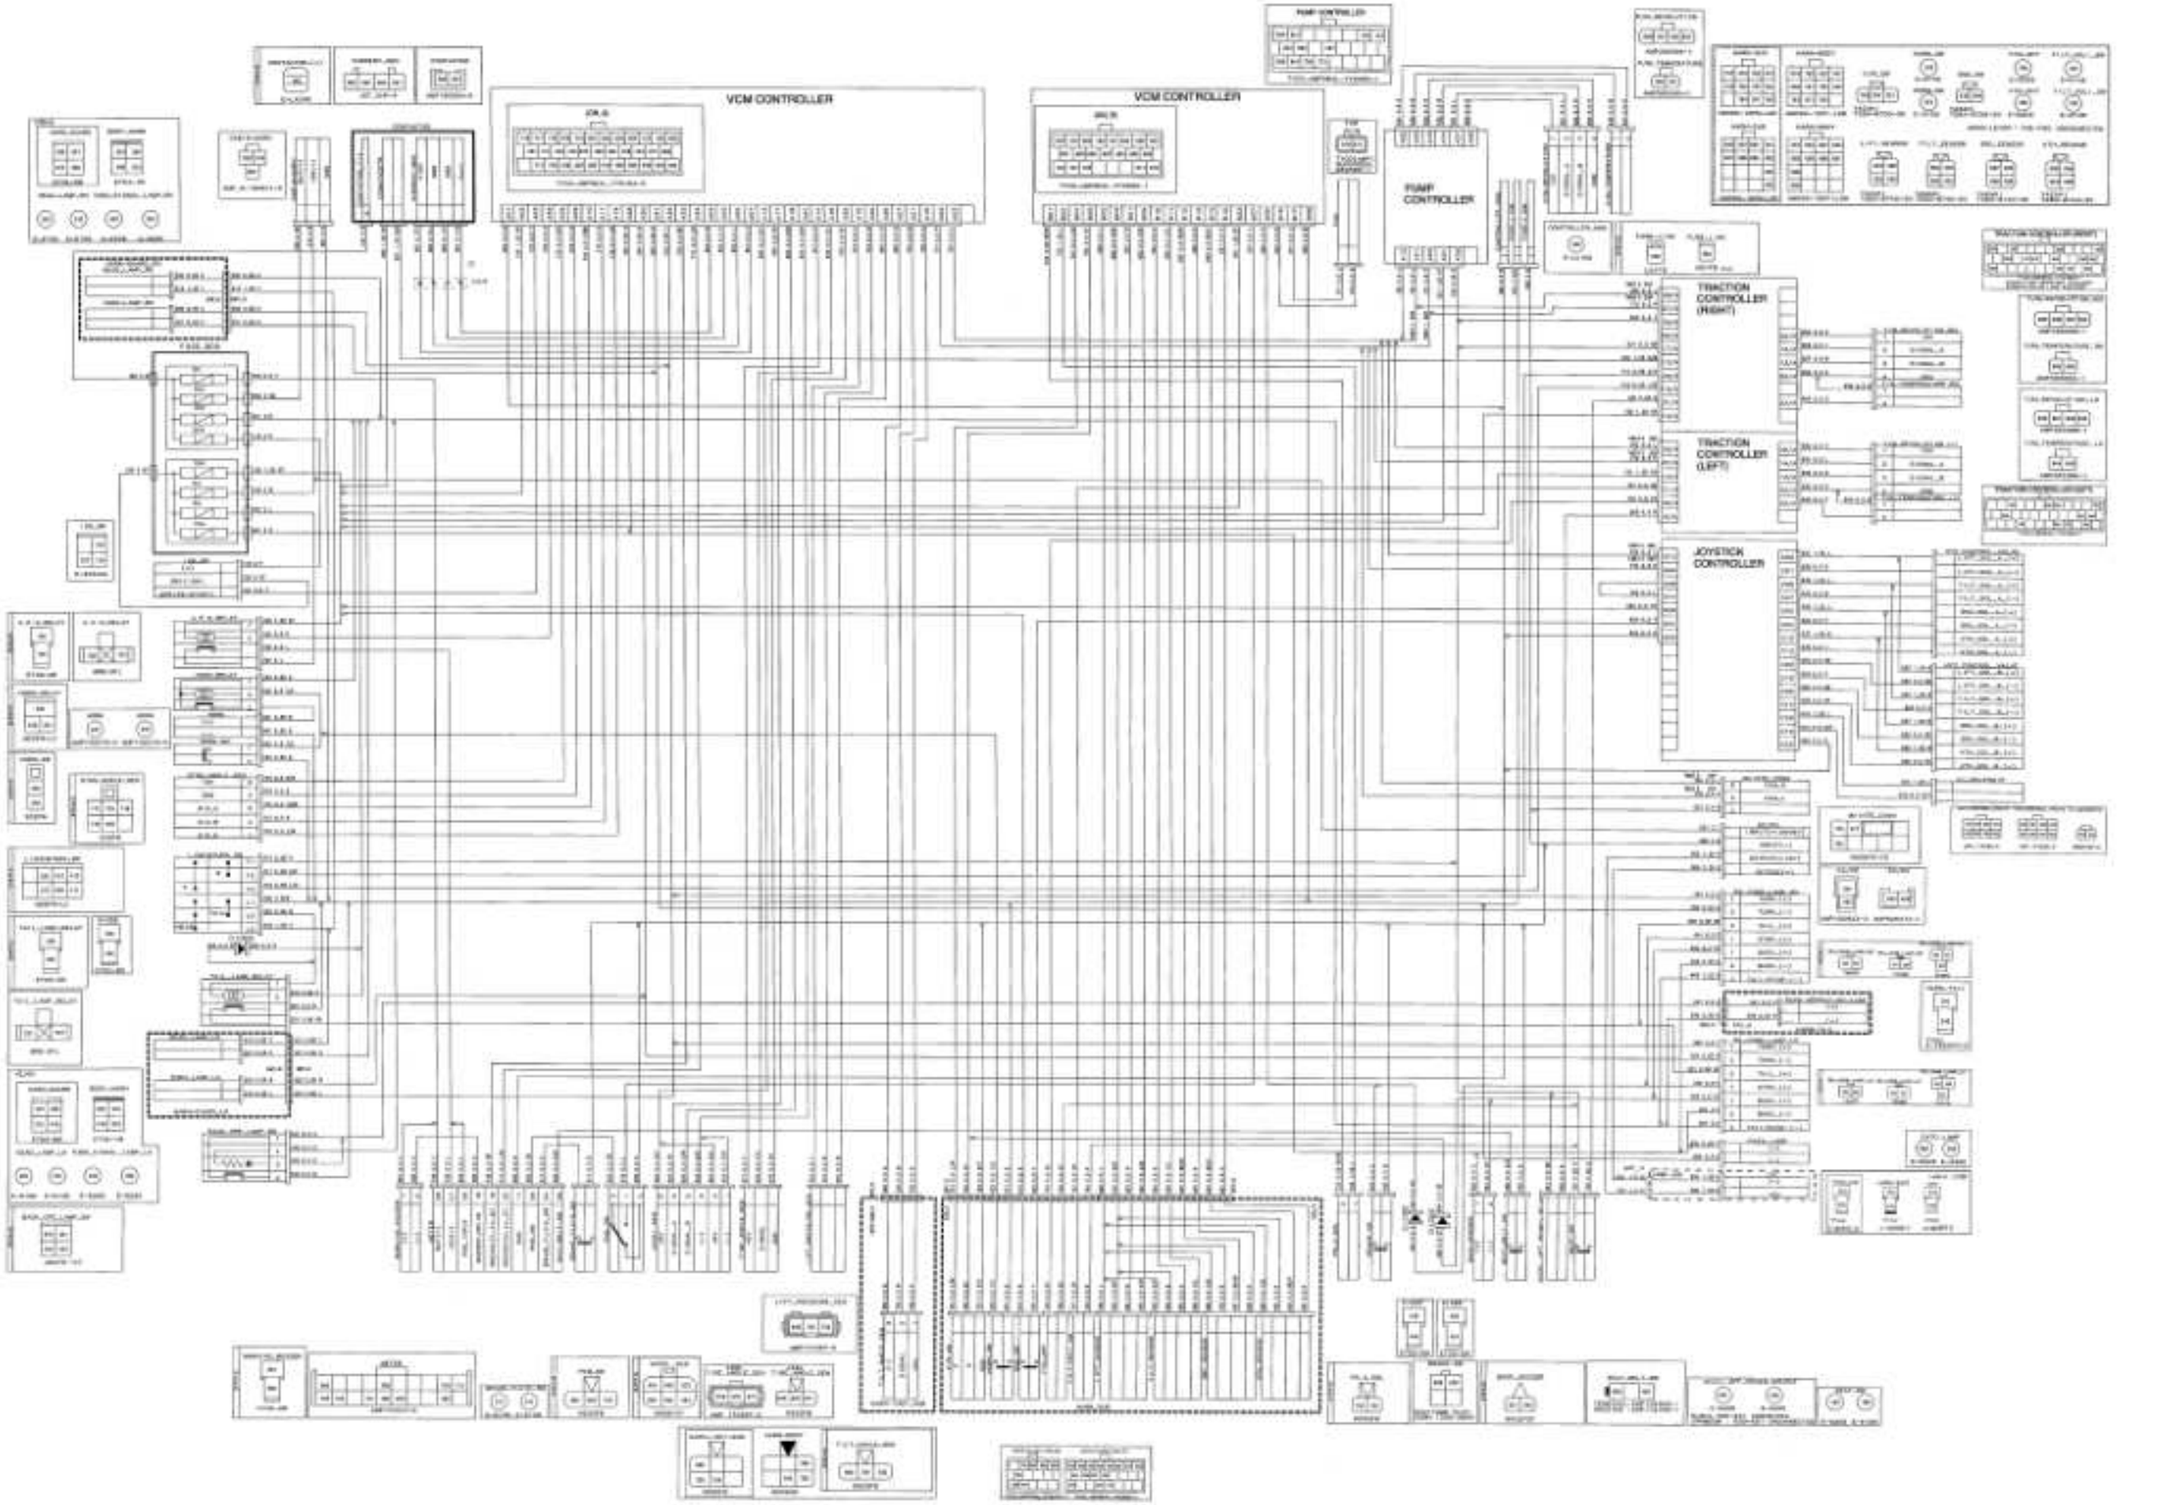

As with any powered industrial truck, when carrying out a test, reprogramming, adjustment, or diagnosis, always raise the drive tire off of the floor to avoid any accidental movement.

Lift mast and secure it with adequate chain and blocks.

This confidential document, "Service Bulletin", is intended ONLY for the internal use of Nissan Forklift Corporation, its employees and national Dealer network. All data contained in this bulletin was based on the most current information available at the time of printing, and subject to change without notice.
