NISSAN FORKLIFT

Nissan Forklift Corporation
240 North Prospect Street; Marengo, IL 60152

SB 2005-225
ELECTRICAL

Date: October 19, 2005

To: All Dealer Principals
All Service Managers

From: Customer Service Quality Department

Subject: VCM Protection - Material for Wet Applications

Applied Model: L01 & L02

Forklifts that operate in very wet applications may experience a communication error, code F03 to be displayed. This is due to moisture getting to the VCM connectors from an opening in the wheel well.

To help prevent this from occurring, NFC has established a weather resistant PVC foam material with an adhesive backing (P/N: 74892-FB00A) that is now available from our Parts Department. This can be applied to the inside wheel well to prevent water from entering into the step compartment through very small frame opening.

To install, thoroughly clean the surface area, remove the adhesive backing from the foam section and place over the opening to cover the gap in the frame.

Please insert a copy of this into your L01/L02 Service Manual in the front of Tab Labeled BE.

If you have any questions, please call the CSD Service Department at 815-568-0061, fax 815-568-0187 or by email service@nfcna.com.

Sincerely,
Nissan Forklift Corporation

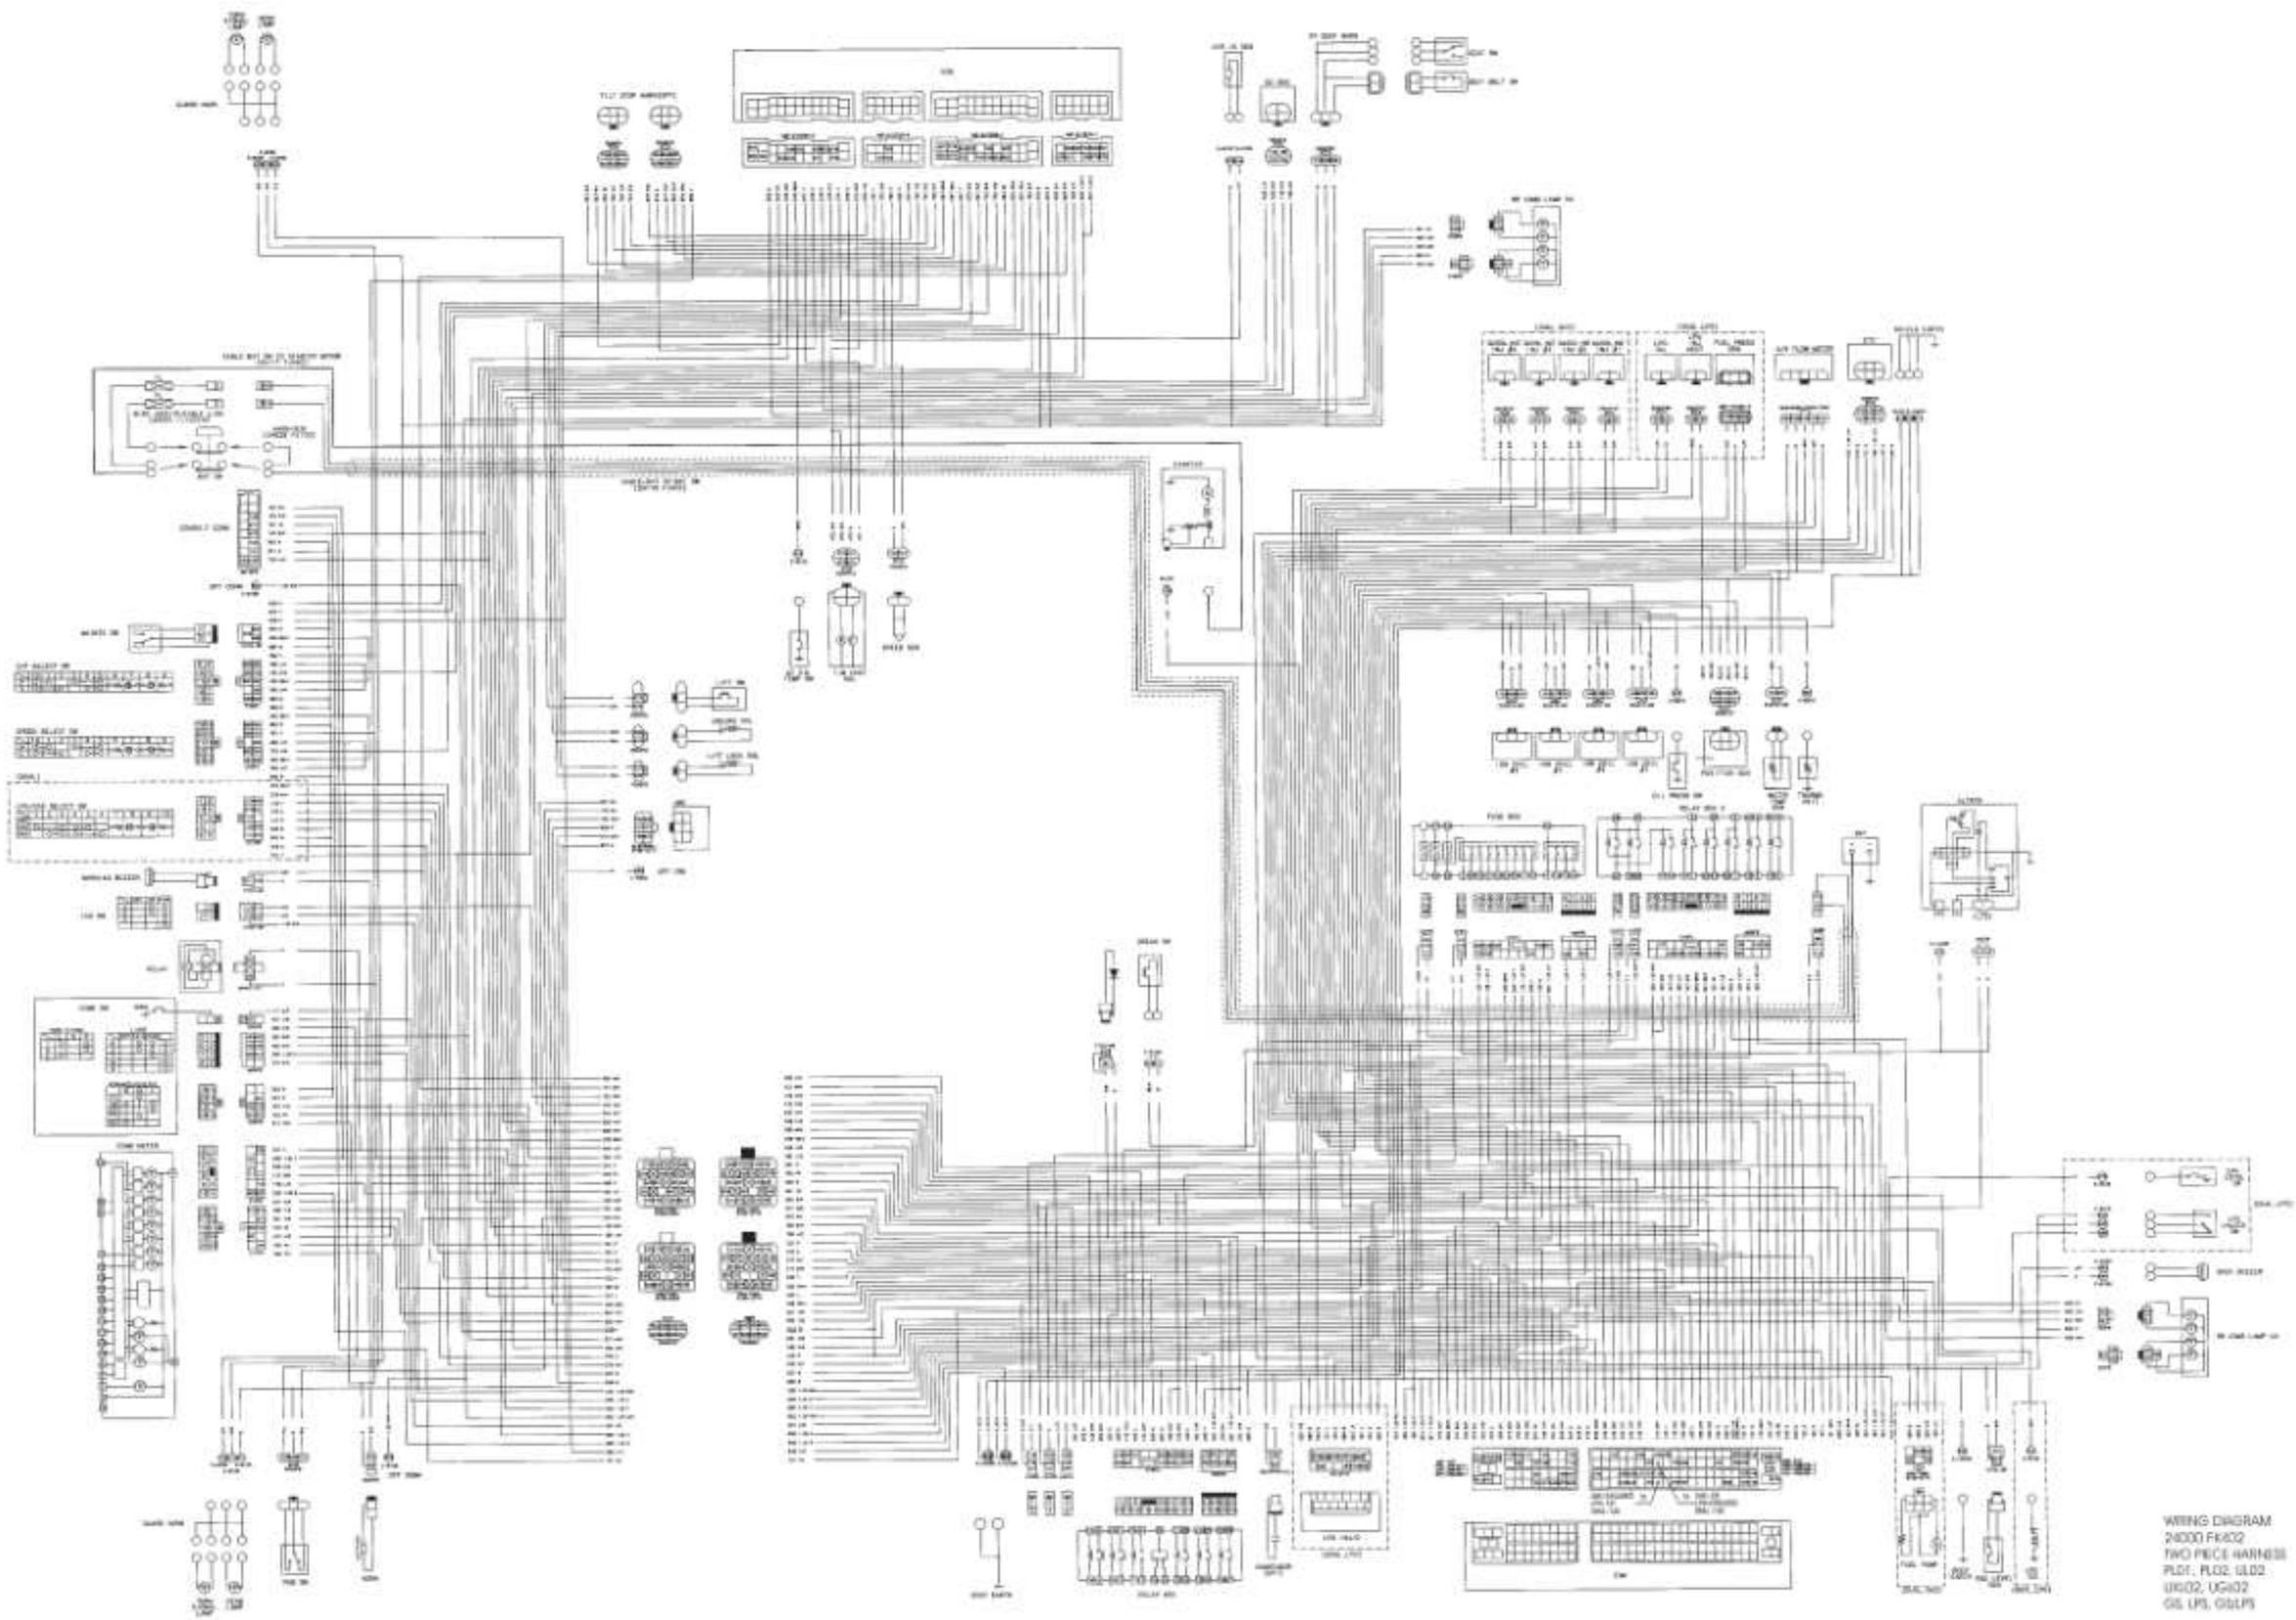

Shane Hauser
Manager, Service Special Accounts
